

## **ESSENTIAL REFURBISHMENTS TO BUILDINGS AT SITH SEWANA**

---

### **Apply floor tiles to the male dormitories -LKR. 623,350.00**

There are about 10 male residents who are not having bladder and bowel control and they MAY pass urine & stools at any unexpected time during the course of the day & night.

Since the floor of the male dormitory is not properly cemented there are cavities which can retain urine and stool particles. The minor staff wash the dormitories twice a day but however this is not sufficient. We have had complaints from the visitors, investigators etc. Hence it is essential to replace the cement floor with floor tiles to resolve this problem. A detailed cost is shown below.

### **Ceiling for the Male Dormitory - LKR .940,985.00**

There are various creatures including serpents that are found in the roof of the Dormitory and it can be very dangerous if these reptiles fall onto the floor or on the beds of the children. As they do not understand the dangers they might play even with them. Pigeons are also a problem and frequently dirty the mattresses .

During the heavy rainy season water drops form the roof above and increases the humidity, giving rise to colds and influenza and can lead to Respiratory Tract Infections.

### **Painting and the wall of the male dormitory- LKR.89,082.**

The walls have not been maintained for quite some time. They need to be painted and refurbished. Our children are at a very low mental age. Hence a pleasant ambience is an essential component which is better than medicine to keep them happy.

Estimated budgets' for the above are being given below for the benefit of those who desire to support this very worthy cause.

**For prospective overseas helpers/supporters you are kindly requested to access the details under "Contact us " found in our Web Site < sithsewana.com>, giving bank account details and the Swift code etc. for your contributions however small. Little drops of water make the mighty ocean. We thank you in anticipation.**
